

Have Town Businesses and Citizens earned a 21st Century Economy?

Or, will they be stuck with 20th Century Infrastructure?

Inflation [in-fley-shuh n] (noun): a persistent rise in the general level of prices that results in the loss of the value of currency and buying power

Total town government GTA rate per mile buying power is **\$1,144 per mile less** than had it simply kept up with construction inflation over the last 15 years. In 2018, this means that in real dollars GTA is **\$71 million less annually** in 2018 than in 2003. Had GTA maintained buying power over the last 15 years, **\$828 million more** would have been invested in town roads.
